Hamza Younas

Senior DevOps Engineer · AWS Certified Solutions Architect

AWS Certified Solutions Architect with 8+ years in DevOps, cloud infrastructure and automation. Expert across AWS (ECS, RDS, S3, CloudFront, SQS, Route 53, the CodeSuite, SES), Docker containerisation, Kubernetes orchestration and CI/CD (Jenkins, Azure DevOps, GitLab) with a proven record running high-availability systems for a 1M+ install consumer platform. Specialised in cloud cost optimisation (30% reduction), multi-cloud migration (AWS→GCP), and observability with Prometheus, Grafana and Splunk. Currently managing AWS infrastructure for DealCart.io with a focus on scalability, reliability and cost efficiency.

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer

Dec 2022 – Present

DealCart.io · Remote

- ▶ Manage AWS infrastructure (ECS, RDS, S3, CloudFront, SQS, Route 53) for a fast-growing grocery startup.
- ▶ Architected scalable microservices on AWS ECS with Docker containers for performance and scalability.
- ▶ Built comprehensive CI/CD across Jenkins, CodePipeline, CodeBuild, CodeDeploy and Azure DevOps.
- ▶ Cut monthly cloud spend 30% via rightsizing, reserved instances and automated scaling policies.
- ▶ Sustained 99.9% uptime for a platform with 1M+ app installs using auto-scaling groups and load balancers.
- ▶ Provisioned infrastructure as code with Terraform; automated config and deployment with Ansible.
- ▶ Led AWS→GCP migration; ran Kubernetes clusters; centralised logging/security with Splunk.
- ▶ Configured AWS SES for transactional and campaign email at 99.5% delivery with bounce management.

Senior DevOps Engineer

Jul 2018 – Dec 2022

OPTIMYSE

- ▶ Managed AWS (EC2, RDS, ECS, S3) for enterprise applications serving 50K+ concurrent users.

TIMEZONE

PKT (UTC+5) · flexible

- ▶ Built and maintained Docker-based microservices for better performance and resource use.
- ▶ Implemented CI/CD with Jenkins, GitLab Runner/CI and Azure DevOps; IaC via Terraform + Ansible.
- ▶ Reduced cloud costs 25% through rightsizing, spot instances and off-hours scheduling.
- ▶ Ran API management with Kong + Konga; owned dev, integration and production environments.

Assistant Manager, DevOps

Oct 2014 – Jun 2018

Nexus Corporation

- ▶ Scaled Linux servers and automated routine operations; supported 100+ concurrent users.
- ▶ Delivered CI/CD with Jenkins and Docker for faster deployments.
- ▶ Developed and maintained Laravel applications with MySQL; managed DigitalOcean infrastructure.

Web Developer

Mar 2014 – Nov 2014

Badar Expo

- ▶ Developed and maintained e-commerce platforms with modern web technologies.
- ▶ Contributed to UI/UX for interactive, user-friendly websites; provided technical support.
